WB-EASY WEIGHBRIDGE SOFTWARE

WB-Easy offers a user-friendly and versatile weighbridge software package – for one or two weighbridges.

Here are some examples of possible configurations:

Single Weighbridge Configuration

Double Weighbridge Configuration

The WB-Easy Key features

- Connects to up to two weighbridges
- On each weighbridge it can control various control systems (access barriers, traffic lights, camera)
- Powerful database management tool
- Stores information such as addresses, products, locations, contracts and vehicles
- Can add up to six configurable database fields
- Price calculation – weighed and non-weighed items

- Tax calculation
- Contract pricing
- Import and export data in CSV format
- Backup/restore database function
- Basic reporting
- Multilingual – English, Italian, French, German, Dutch
- No annual fee
- Legal for trade
- Can be upgraded in the future to WW4 with no loss of data

EASY DATA MANAGEMENT

At the heart of the application is a powerful database module designed to easily manage data. Users can add up to six configurable database fields, set file variations as well as set index and sorting codes to create printouts and basic reports. WB-Easy can also be used to calculate price and tax.

EASY CONTROL

WB-Easy can be used to provide complete vehicle management systems at a plant to help streamline vehicle flow starting with incoming goods through to despatch of finished product. Full data is stored in the central management system providing full product and vehicle traceability.

EASY INTEGRATION

WB-easy is designed to control multiple hardware such as indicators, access barriers, traffic lights and snapshot overview camera depending on your needs.

READY TO PERFORM

A standard easy-to-use out of the box application designed to cover the basic weighing functionality of up to two weighbridges.

For a more configurable weighbridge software, with additional control functionality and designed for multiple weighbridges, please ask us about our Winweigh IV weighbridge software
